

CTEK PRO25 25A Battery Support Unit & Charger For 12V Vehicles

Description

The CTEK PRO25 25A battery support unit (BSU) and charger for 12V vehicles is lightweight and highly portable. This makes it the ideal tool whether you are looking to support the vehicle's battery for diagnostic work, including key programming, or for professional battery charging in the workshop or showroom. It is fully automatic and easy to use, providing a safe, fast charge that meets the needs of the individual battery.

The integrated safety features of low voltage and current ripple ensure safety of the battery and the vehicle's delicate electronic systems, while the dedicated lead-acid reconditioning program works to restore battery life and also recondition flat batteries. It is IP44 classified for outdoor use and comes complete with 2 year warranty.

2 Year Guarantee
