

## YALE All-In-One Indoor & Outdoor Camera

### Description

---

The YALE All-In-One Camera is IP65 rated and suitable for both indoor and outdoor use and can be mounted outdoors using the integrated wall bracket, or used indoors free standing. It has full HD1080p quality, plus 10m night vision, ensuring crisp detailed footage around the clock. It features a built-in spotlight which has on, off or motion detect only options with adjustable brightness to suit the needs of the user. The motion sensor also sends detection alerts direct to your smartphone via the use of the free iOS and Android compatible app so that the user is always in the know when someone has called at the door, or choose to only receive alerts when visitors enter a certain area using image masking.

A siren alarm can be activated within the Yale View app providing the user with full control when dealing with unwanted or suspicious visitors, and the two-way talk feature allows for communication with callers. Simply add an SD card to the camera to capture all motion detect events, or connect it to a Yale Smart CCTV DVR for constant back up recording of the footage.

Please note that this item will not work with 5G internet.

Works With An App
