

## FAITHFULL File Card Brush Kit - 2 Piece Set

### Description

---

The FAITHFULL File Card Brush Kit is a 2 piece set featuring a smaller straight brush with 2 rows of 40mm long bristles, and a flat file brush (brush head 40mm x 113mm). These wire brushes are ideal for cleaning the cutting teeth of both wood and metal files and quickly remove swarf and material shavings, with the smaller straight brush being used primarily to brush coarser files and rasps, and the finer card brush is then used for final cleaning. Both brushes feature a soft grip plastic handle and a convenient hanging hole ensuring that they are easy to both use and store. Regular cleaning can help to ensure a longer working life of your files.

### Features
