

Description

The FULLEX Universal UPVC Repair Lock is a three piece lock with 3 hooks and a 3 piece keep which is suitable for single UPVC doors. It has a split spindle and an easily reversible latch with snib to suit both left handed and right handed applications. It features adjustable hook centres (1030mm - 1500mm) and both the top and bottom hook centres are independently adjustable with a 16mm faceplate and 92mm centres. The lock has a dacromet coated A3 sintered steel centre hook with an A3 zinc and clear passivated faceplate and gearbox. It has been tested for corrosion resistance to BS EN 1670 Grade 4 for 240 hours and comes complete with a 10 year guarantee.
