

Description

The AXIM PR7085 is a concealed rod panic bar exit device suitable for doors with maximum dimensions of 2135mm high x 1155mm wide. It features an extruded aluminium cross bar with anodised finish and abrasive resistant housings and lever arms. The panic bar has nylon brushes for a silent operation and heavy duty lever springs for ensured durability. The internal mechanism is manufactured from stainless and plated steel, with concealed fixings for an aesthetically appealing appearance. It has 8.5mm diameter steel operating rods with a 16mm bolt throw - the bolt length is adjustable to ensure correct alignment.

Complies to BS EN 1125
