Description

The Paxton10 Paxlock Pro is a battery powered access control unit integrated in a stylish door handle which is available in either black or white and for either internal or external applications. It can be installed in standalone mode (with up to 10,000 users) or as part of a networked Paxton10 system (with up to 50,000 users), offering sites flexibility to upgrade to a networked solution as and when required. The handles are IP55 and IK10 rated for maximum weather and impact resistance. The Paxlock Pro works seamlessly with the Paxton10 range and is a multi format token reader (Paxton, EM4100/02, MIFARE®, MIFARE ® Classic, MIFARE® DESFire® EV1, MIFARE Plus®, MIFARE Ultralight®, MIFARE Ultralight C®, MIFARE Mini®, HID® Prox). The unit is easy to install and maintain, with up to 2 year's battery life with one set of batteries. It also provides wireless real-time event reporting and has a 15m Bluetooth® range.
