

Description

The Paxton10 Wireless Connector connects to any Paxton10 controller and is intelligently controlled through Paxton10 software. With built-in wireless Bluetooth® technology, this supports wireless functionality allowing the Paxton10 system to connect to and control Bluetooth®, Z-Wave & BACnet devices, meaning the user can control a variety of electrical appliances, control or dim lighting or monitor a building with sensors. It is suitable for both wall and ceiling mounting, and features health and fault-finding LED lights for simple visual diagnostics.

Wireless Data Connection
