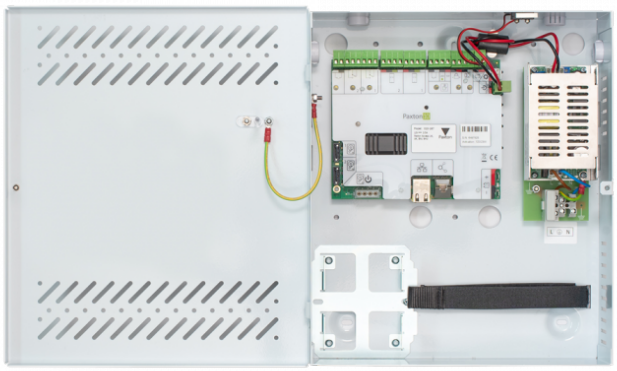
Paxton10 Video Door Controller 12V 4A With Power Supply Unit



Description

The Paxton10 Video Door Controller combines the control and monitoring of a single door with a video recorder into one unit for one simple and seamless access control system. The built in video recorder has the option for expandable storage - two SATA hard drives can be installed simultaneously in a RAID1 configuration (drives not included). It has clearly labelled terminals, ensuring a hassle free installation, and is suitable for wall mounting. It has a 12Vdc 4 amp power supply with a 12V lead acid battery back up connector and features locally stored programming, enabling the system to continue to work if the connection to the server is lost. It has an operating temperature of 0°C - 45°C and comes complete with a 5 year warranty.

5 YEAR

5 Year Guarantee
