

Description

The Paxton10 Door Controller PCB Only is the building block to your networked access control system for the control and monitoring of a single door, with a port to allow support of up to three Paxton10 connectors for additional functionality. It has clearly labelled terminals, ensuring a simple and hassle free installation and features locally stored programming which enables the system to continue to work if the connection to the server is lost. It has an operating temperature of 0°C - 45°C and comes complete with a 5 year warranty.

5 Year Guarantee

Features

- 5 year warranty
- Distributed intelligence architecture - no central point of failure
