# Paxton10 Door Controller 12V 2A With Power Supply Unit

Description

The Paxton10 Door Controller is the building block to your networked access control system for the control and monitoring of a single door, with a port to allow support of up to three Paxton10 connectors for additional functionality. It has clearly labelled terminals, ensuring a simple and hassle free installation, and is suitable for wall mounting. It has a 12Vdc 2 amp power supply with a 12V lead acid battery back up connector and features locally stored programming, enabling the system to continue to work if the connection to the server is lost. It has an operating temperature of 0°C - 45°C and comes complete with a 5 year warranty.

5 Year Guarantee

Features

- Distributed intelligence architecture - no central point of failure
