

Description

The PAXTON10 connects to your current building alarm system, enabling control of other appliances, such as the opening of fire doors in the event of a fire alarm. It is designed to fit with other connectors in the connector housing, or in specific alarm boxes where appropriate. It has fire alarm monitoring plus intruder alarm monitoring and control, and is easy to install thanks to the clear intuitive labelling. It features fault finding LEDs and comes complete with a 5 year warranty.

5 Year Guarantee
