

SASHSTOP Internal Fixed Sash Stopper

Description

The SASHSTOP Internal Fixed sash stopper is a versatile product which can be used on UPVC, composite and wooden doors. It has been designed to fit over the same size as a window handle and is an ideal replacement product. It is non-locking with an internal sash-jammer which securely fastens all the way through the door or window, providing additional security.

Reversible Handling

Features

- Ideal replacement for a window handle
- No external lock
- Provides additional security for doors and windows
- Suitable for use on UPVC, composite & wooden doors
