

ASEC Mighty Lube Universal Lubricant With PTFE

Description

The ASEC Mighty Lube is a universal lubricant fortified with PTFE (commonly known as Teflon). It has a strong penetrating action and is excellent for the lubrication of things such as cylinders, chain and wire rope. The smart straw 2 way spray system enables both a precision stream and a wide spray. It reduces friction and wear, protects against rust and corrosion and also removes water and moisture; it has a wide working temperature range of -43°C to +170°C.
