

Description

The SUPRA KIDDE P500 Key Safe is suitable for surface mounting, with included mounting hardware, and can store 5+ keys. It features a push button keypad for convenient keyless access and has 12 buttons, providing 4,096 possible unique code combinations, which are quick and easy to change - it is also supplied with an optional anti-tamper screw which can be used to prevent the changing of the code. The solid triple wall metal construction features stainless steel reinforcements, with a pry resistant stainless steel security liner and a full weather resistant cover ensuring multiple security layers to protect your keys. The P500 Key Safe is available with an optional alarm sensor - when connected to your alarm system, it can then monitor when the key safe was opened or close, and also sets off the alarm if left open or removed from the wall.
