

ASEC Traditional Post Box

Description

The Traditional postbox range from Asec is a medium sized mailbox which is ideal for use outside, as it is corrosion resistant with a weatherproof seal. Featuring a pitched roof with scalloped edges, this is an attractive choice of post box. It can be used as a standalone mailbox or assembled as a bank (not available with holes for lateral fixing), ideal for use in common areas of flats.

With a durable powder coated steel construction, the Traditional post box has an aperture size of 228mm x 22mm. This postbox is keyed to differ and supplied complete with 2 keys and all required fixings.
