

## EVVA AirKey Control Unit To Suit EVVA AirKey Wall Reader

### Description

---

The AirKey control unit is designed to control 1 AirKey Wall Reader by activating the electronic locking elements in the door and is easy to install in most applications thanks to its compact design. It has a high switching performance because the control unit is equipped with two relays, each with a maximum switching performance of 250 VAC. The control unit is CE certified, requires a supply voltage of 12VDC and is supplied in a plastic enclosure which is rated to IP54.

### Features

---

- Data is buffered for up to 72 hours in the event of power cuts
- Encrypted data transfer between wall reader and control unit
- IP54 rated
- High switching performance - 2 x 250 VAC switching relays
- Compact design makes installation easy
- Can control 1 AirKey wall reader per control unit
