

BORG LOCKS BL3130 ECP Knob Operated Marine Grade Metal Gate Double Digital Lock

Description

The BORG LOCKS BL3130 double sided digital lock is designed to suit metal box section gates with a thickness of 30mm - 60mm and features a keypad on both the internal and external sides. Supplied with an adjustable spring loaded latch, this lock utilises a forend fixing system for increased security and ease of fit. Complete with a marine grade finish, these reversible units have been salt spray tested over 1000 hours and are available with the option of a deadlocking key override. The lock features an Easicode Pro (ECP) quick code changing mechanism, allowing for a quick on-the-door code change.

Reversible Handing

Weather Resistant
