

Description

The PAXTON Standard Entry Monitor is an audio/video door entry system that works standalone or alongside the Net2 or Paxton10 access control systems. It has an intuitive touchscreen user interface, with a range of features, such as selectable ringtones, call snapshot and a 'view video' mode, plus LED status indicator. The Entry panel has a modern and attractive design and is suitable for surface mounting.

Features

- Easy plug and play expansion for large systems
- Units auto detect on setup for straightforward installation
- Can be used as a standalone system or alongside Net2 or Paxton10 access control systems
- Intuitive colour LED touch screen monitor
- Smart, simple audio/video door entry
