

ABUS 183AL/45 Weather Resistant Combination Padlock

Description

The Abus 183AL/45 Combination Padlock is ideal for outdoor use, it has an aluminium body along with stainless steel internal components. It has a secure 5 wheel locking mechanism that offers over 100,000 combinations and its shackle can be swapped out if required so that the lock can be quickly adapted to individual requirements.

This padlock is ideally suited to outdoor use for the protection of medium value objects or with an average risk of theft such as doors, gates, lockers, tool boxes, basement windows, sheds and barriers.
