

ERA Vectis Hookbolt Centre Case And Slave Centre Case Keyed Alike

Description

This keyed alike ERA Vectis centre case set includes a 35mm backset hookbolt gearbox for the master door and a 35mm backset slave gearbox for the slave door, complete with 3 mortice keys eliminating the need for a euro profile cylinder. No cylinder means the VECTIS PLUS is free from cylinder manipulation, breaking/snapping and plug extraction. The slave unit is designed for use on the passive leaf of a pair of French doors, security shootbolts then secure the lock into frame offering optimum compression at the top and bottom of the door.

The lock also incorporates a split spindle function to allow it to be used in either levers or lever pad handle applications. The gearbox is secured on a 16mm face bar making this lock an ideal choice for UPVC french door applications. The lock meets the requirements of BS EN 1670:2007 Grade 4 (240 hours) for corrosion resistance; and to ensure smooth and consistent performance over time the lock is endurance tested to 50,000 cycles.
