

SILCA Universal Remote Car Programming Cable

Description

The Silca Universal Remote Cable has two types of USB connectors (Micro-USB & USB type C) making it compatible with virtually all kinds of Android Smart Phones. Simply download MySilca SRP app from Google Play onto your Smart Phone to get started.

MySilca SRP is exclusive to Silca, it is a free app to allow you to operate the Universal Remote Car Key Solution. It is compatible with Android operated smart phones that support the OTG technology (USB On-The-Go), please note that this solution is not available for iOS devices. The Silca Universal Remote Car Keys are a range of quality remotes that, once programmed, duplicate the functions of the original vehicle key. They are available in different designs making them suitable for the most popular brands worldwide. They feature three push buttons for lock, unlock and boot release, and incorporate a Silca quality retractable flip blade.

The Silca Universal Remote Cable connects the remote to a smart phone to pre-set a new remote in just a few seconds. You just need to select the vehicle model from MySilca SRP app and the cable enables pre-set data to be written onto the remote key.
