

Description

The MILA SupaSecure TS008 Enhanced Letterplate offers enhanced security including patented anti-fishing technology, a secure 80° opening angle and angled postal ramp. It is quick and simple to install with no special fixings required and features a slim 45mm internal projection. The letterplate features effective weather sealing, clever water drainage and is corrosion resistant, tested BSEN 1670 Grade 6. It is highly durable, tested to PAS24: 2016, TS008 grade 2, plus endurance tested to 20,000 cycles and 480 hours salt spray. The SupaSecure is Secured by Design (Police approved specification), with the logo etched into the letterplate as a visual deterrent.

Complies To BS EN 1670
