

ERA Invincible Dual Network Comms Alarm Kit E11

Description

The ERA Invincible Wireless Dual Network Comms Alarm Kit is an alarm system designed to keep you informed. It functions using dual network telecommunication, and can be operated using either the touchscreen control panel, or remotely via a free Smartphone App. This system can also be monitored remotely, including `listen in` and `two way talk` functions, as well as providing SMS text alerts for: arming/disarming, intruder, tamper, power failure/recovery & RFID Tag identification.

The Invincible Alarm Kit allows you to store 5 x Emergency phone numbers and 5 x SMS numbers, speed dial to master phone number for hands free calling, and adjust entry and exit delay. The siren features adjustable volume and duration. Quick disarm at the Control Panel by RFID Contactless Tags (which are nameable for easy identification of who disarmed the system and when). The built-in siren has adjustable volume and duration (external sirens are available separately), plus Arm, Part Arm and Disarm Modes (silent part arming). The kit features a built-in SIM Card holder (accepts standard size SIM Card), 150 Event Log and tamper protection.
