

CODELOCKS KitLock KL1100 KeyPad Locker Lock With Powered Latch

Description

The CODELOCKS KitLock KL1100 KeyPad Locker Lock is a stylish slimline standalone lock with a powered latch, maintaining the traditional code access keypad found in classic KitLock products whilst also providing additional user codes and auto-unlocking capabilities. It is easy to install as part of a new or retrofit installation and supports both private and public functions with up to 100,000 operations and the option for up to 20 user codes. The lock is non handed and suitable for indoor use with a door thickness of up to 25mm.

Combination Mechanism

Reversible Handing
