

CODELOCKS KitLock KL20 Vertical Mechanical Combination Lock With Auto Scramble

Description

The CODELOCKS KitLock KL20 Mechanical Lock offers easy mechanical keyless access and is suitable for a variety of internal applications, including lockers, cabinets and cupboards. It is easy to install as part of a new or retrofit installation with convenient on the door programming. There are over 10,000 unique 4 digit code combinations available and the lock features an auto scramble function - the dials automatically scramble to 0-0-0-0 when the lock is used, ensuring that the user code is hidden from others.

Combination Mechanism
