

CODELOCKS Kitlock KL1000 G3 Battery Operated Digital Cabinet Lock

Description

The CODELOCKS Kitlock KL1000 G3 Battery operated lock is designed for a variety of locker and cabinet applications. It uses 2 x AAA batteries and the battery can be changed from the front of the unit. Users can also choose between private mode which allows the lock to operate in a way that suits private lockers typically used by one individual, or public lockers that will see multiple occupancies for short periods of time. The KL1000 G3 offers up to 20 unique 4 digit User Codes when operating in Private Function, thus allowing a single cabinet to be accessed by multiple users. Also there is a key override feature (key available separately).

10 Buttons

Key Override Facility
