

ADVANCED DIAGNOSTICS ADC263 Smart Programmer Kit for Mercedes with 3 x HU106S23 Silca Remotes

Description

The Advanced Diagnostics ADC263 Smart Programmer Kit is a lightweight and easy to use programming device for Mercedes keys which connects to the Smart Pro key programming machine via USB port. Suitable for the Silca range of Mercedes remotes, the kit includes the ADC260 Smart Programmer and is supplied with 3 x Silca HU106S23 slot keys (with 3 function buttons for lock, unlock and boot release). The key emulator simulates the original key to read data from the car immobiliser, while the base station features an infrared lot for key reading and writing which lodges into the Smart Aerial slot on the back of the Smart Pro. Please see product documents for further details on the HU106S23 slot keys (L32229).
