

SILCA Rapid Fuse for Key Machines

Description

These SILCA RAPID fuses are ideal for use when a new fuse is needed for your compatible key machine, please check your Silca manual and choose the appropriately rated fuse for your needs. Rapid or fast-acting fuses do not have the capacity to withstand temporary overloads, they give a quick response to electric spikes and then protect the key machine by breaking the circuit.

Features

- Supplied in singles
- Choose the amp rating as listed in your machines manual
- Rapid Fuse
- Genuine Silca part for key cutting machines
