

AMALOCK DB101 Wireless Wi-Fi Video Doorbell c/w Door Chime

Description

The Amalock DB101 is an easy to install wireless Wi-Fi video doorbell suitable for both residential and commercial entrances. Whenever a motion is detected the camera streams an image to your mobile device to alert you of any activity at the entrance allowing you to take action. The built in 2 way audio allows you to talk to the visitor as they ring the doorbell. No monthly subscription is needed and the doorbell is supplied with a 16GB memory card. Also included is a white indoor mains powered plug in door chime.

Works With An App

Battery Backup
