

WD-40 400ML Specialist Long Lasting Spray Grease

Description

The specialist long lasting Spray grease from WD-40 is a high viscous formula that won't drip or run, and which is suitable for any metal application (including vertical surfaces) and it comes complete with the smart straw applicator which allows for precise use in hard to reach areas. Use it on all metal to metal contacts for lubrication and water displacement, as well as preventatively to provide protection against rust, corrosion and seizing. It is the perfect choice to use on gear mechanisms, locks, chains, pipes, nuts and bolts, screws, taps and tools.

Features

- Wide temperature range of -20°C to +115°C as grease, then to +260°C as liquid
- Safe to use on all metal surfaces
- Can be applied on vertical surfaces
- Excellent corrosion protection
- Excellent lubrication and water displacement properties
- Strong adhesion and sealing properties
- Non-drip formula
