

Description

The Intratone 06-0129 is designed for real time and remote management of car park access. It is a RF radio receiver kit that comprises 2 parts housed in a single unit. There is the GSM module which stores data locally and can be updated through its GPRS connection and also the built-in RF radio module which communicates & decodes the transmitters. You can also add up to 2 mini coded keypads to this system.

IP 67 Rated

Wireless Data Connection

Features

- 10 years free data syncing
