Description

The Intratone 06-0131-EU proximity reader kit is an easy to use proximity reader system. This kit is suitable for one access point and comes with 10 years free data and syncing. The system enables controlled access which can be remotely configured and programmed via the supplied GSM module, providing real-time online management accessible from any web browser with an internet connection.

This allows functions such as remotely pull event logs, add / change / delete proximity tags and also create timed parameters to restrict access.
