

Description

This screw fix keep plate is to be used with the Gatemaster GLB and GLB02 gate locking bolts. It is to be fixed to the second wooden gate so that the throw passes through the slot in the lock plate and is secured with the deadbolt, this ensures that the gates are unable to be sprung open.

Features

- Also use for extra security on single gates
- Fix to the second gate
- Screw fixed
- Slotted lock plate for wooden gates
