

WINKHAUS AV2-F 2060 M2 Lever Operated Latch Only 20mm Square Faceplate - 2 Hook

Description

The automatic locking AV2 2 hook multipoint lock has a 20mm square faceplate and is ideal for use on timber and composite doors. The AV2 Autolock has the optional capability of becoming an electronic access controlled locking system. The lock is designed to accept a "screw on" 12v electronic motor which can then be controlled by means of industry standard multi option access control systems. When activated the two solid high tensile steel hooks and central latch are withdrawn thus forming the blueMatic AV2-E. The extreme versatility of the blueMatic AV2-E Electronic Locking system is achieved through its easy integration with all access control systems which subsequently leads to its suitability for many different applications.

45mm Backset

92mm Centres

Features

- Latch and two hooks
