

# EVVA SKI Internal Scandinavian Thumbturn Cylinder

## Description

This Evva SKI internal Scandinavian thumbturn cylinder is suitable for use with external SKA cylinders (sold separately) and is available in both 5 and 6 pin styles. As it is an internal cylinder there are 2 accessible holes to allow bolts to be inserted to screw into the back of the SKA External Scandinavian Cylinder on the other side of the lock case.

5 Pin Mechanism

6 Pin Mechanism
