

EVVA HPM Shackle

Description

This range of Evva HPM padlock shackles are to be fitted to the HPM padlock body. These shackles are made from hardened steel and are suitable for use on any hasp with an opening greater than 8mm. The various sizes make this an ideal product for securing vertically positioned hasps, often found on roller shutters, chain barriers and security fences.

Features

- Shackle material: hardened stainless steel
- Can be used with any hasp with an opening > 8 mm
- Shackle diameter: 8 mm
- To secure vertically positioned hasps or fasteners often found on roller shutters, chain barriers and security fences
- Range of shackle lengths to be fitted with Evva HPM padlock body
