

Description

The Exidor TB450 with electronic latch retraction is a surface mounted touch bar panic latch for wooden, single doors up to 900mm wide. Integration with the buildings access control system ensures that security and access restrictions are maintained. Simply pushing the touch bar always provides safe and speedy exit in panic situations, whilst the patented lip prevents accidental jamming of the touch bar. Can be used on steel or aluminium doors when using an appropriate keep (not supplied).

Complies to BS EN 1125

Fire Tested

Reversible Handing

UK Manufactured

Features
