

CODELOCKS CL0600 Marine Grade Digital Lock Front Only To Suit Panic Latch

Description

The CL0600 PK BK MG is a marine grade digital lock from Codelocks, suitable for both internal or external use. It is supplied with a digital plate only with an extra long spindle to work with most single point panic pads. The spindle is operated by the outside lever after the correct code has been input.

It has been salt spray tested to 1,000 hours and comes complete with neoprene seals, ensuring it can withstand harsh outdoor environments and even coastal applications. The lock has a black finish with stainless steel buttons and is designed to suit doors with a thickness of 35mm to 60mm. There are up to 8,191 non sequential code combinations available and it features tumbler alignment for easy code change. Codelocks fire kit packs can be fitted to latch locks for 30 or 60 minute fire doors (tested in accordance with BS EN 1634 1:2008).

Clean by Codelocks is an optional finish available to special order on many Codelock products. The clear coating combats SARS-CoV-2 coronavirus (COVID-19) and can reduce bacterial growth by 99.96%*, providing an additional measure of protection over sanitisation. Clean by Codelocks features an ISO certified photocatalytic coating which offers enhanced protection against viruses, bacteria, germs and other environmental toxins. For full details please view the data sheet in the associated documents or to order please contact our Specials Department.

IMPORTANT:

Before ordering a Codelocks front/back plate set for use on an existing lock case, the current lock case must be tested to ensure it is compatible. Please see the 3rd Party Lock Disclaimer PDF document below for full information.

Supplied With 2 Keys
