Description

The Paxlock Pro from Paxton is a battery powered access control unit integrated in a stylish door handle which is available in either black or white and for either internal or external applications. When used with the applicable bridge this improved version will integrate with Net2 or Paxton10 systems and can also be used standalone, which offers sites the flexibility to upgrade to a networked solution as and when required. They are certified as being suitable for use on FD30 and FD60 fire doors, the external version is IP rated for weather resistance and both variants have a scratch resistant coating.

| 5 Year Guarantee | Fire Tested |
