

SASHSTOP Torchguard Door Handle Protector Discreet Mini 237mm x 40mm

Description

The Sashstop Torchguard range is a heat deflecting security plate manufactured from stainless steel plate with a white powder coated finish. It fits behind the handles to provide protection from attack by a blow torch and is simple to use. This mini discreet model is shorter with less width than standard, has rounded ends and is an ideal additional security product.

UK Manufactured
