

SASHSTOP Torchguard Door Handle Protector 35/35 Backset 300mm x 70mm

Description

The Sashstop Torchguard range is a heat deflecting security plate manufactured from stainless steel plate with a white powder coated finish. It fits behind the handles to provide protection from attack by a blow torch and is simple to use. This model is designed to suit doors with a backset of 35mm and is an ideal additional security product.

UK Manufactured
