

SILCA D7A7047ZB Cloud Cloning Solution RW5 Machine

Description

This Silca RW5 package is a cloud cloning device with colour display. It has an intuitive software interface with full connectivity through the integrated Wi-Fi and bluetooth and has a powerful antenna. The cloud cloning offers superior calculating performance compared to stand alone device which means faster cloning process times.

It is a lightweight, portable device with an internal rechargeable battery and is supplied complete with R-Snoop, USB cable and mains charging cable with a universal AC adaptor.

Features

- Includes R-Snoop required for ID46, ID48 & ID49 Snoop processes
- Compatible with GTI Pro Chips
- All cloning calculations done via the cloud
- New universal transponder means less inventory needed compared to GTI
- Complete support ecosystem based around MYKEYS Pro
- Intuitive software
- New cloning capability for Mazda 8C Temic (not available for RW 4+)
- Colour display
