

LOCINOX Valentino 40/40 Battery Operated Electronic Gate Lock Surface Mounted

Description

The Locinox Valentino is a battery powered electronic code lock suitable for gates, which has an illuminated code panel on both sides. It is energy efficient with up to 100,000 open/close cycles possible on the same set of 6 lithium-metal AA batteries, which are included. Access codes can be easily set up and it is possible to have different entrance and exit codes. The housing is aluminium and the unit is designed to be strong and vandal proof. It is weather resistant with IP56 rating and an ISO 9227 KTL / E-coated lock box which withstands 1000 hours of salt spray test.
