

N&C Phlexicare Genuine RADAR Lockset SAA

Description

The genuine N&C Phlexicare RADAR lockset is designed for use on disabled public toilets and as part of the National Key Scheme (NKS) offers disabled people independent access to open the toilets using their Radar key. Now in its 5th generation this 6 lever lock can easily retrofit to existing installations and has a modern rounded edge design. There is an external indicator, an external emergency coin release and the unit has bolt through fixings. This lock meets the requirements of BS8300 and is supplied with 1 Radar key.
