

EVVA AirKey Starter Package Inc Cylinder, Assembly Tool, 3x Fobs And 6 x Key Credits

Description

This AirKey starter pack contains a Euro cylinder with AirKey proximity access externally and a mechanical turn on the inside, an assembly tool, 3 proximity fobs and 6 key credits. It is ideal for use with a suitable mortice lock.

The AirKey cylinder is easy to install and has a broad range of uses, as it can be used anywhere a standard euro profile cylinder could be used. This unit has a standard turn on the inside of the door, meaning that exit can be granted at any time (subject to correct installation) by using the turn. Access can be gained from the outside by using your NFC-compatible smartphone (Android or iPhone), where keys can be easily sent using SMS text messages with push notification alerts, Bluetooth, and also Evva AirKey key cards.
