

FUHR 855 Type 3 Key Wind Latch & Deadbolt - 2 Hook & 2 Roller

Description

The Fuhr 855 type 3 keywind is a latch and deadbolt single spindle multipoint, with 2 hooks and 2 rollers. It is operated using the key which engages and disengages the locking points. Two full turns of the key are required to fully engage the locking points. Instead of a lever handle, a fixed pad is used on the outside of the door and the key used to operate the latch. From the inside, the latch can be operated using a lever handle. The latch and deadbolt are reversible and the unit is Secured by Design (Police approved specification) and PAS24 accredited.

35mm Backset

92mm Centres
