

## SILCA D7A6966ZB R-Snoop (ID49-1E) For RW5 & Smart Aerial+

### Description

---

The Silca D7A6966ZB R-Snoop is the first worldwide solution for cloning ID49-1E Renault, Dacia and latest generation 7K and 6K Kia and Hyundai models. By adding the R-Snoop to your RW5 or Smart Aerial+, cloning is possible of ID49-1E Renault and Dacia models . The new technology utilises the GTI Pro transponder chips and is available on the latest software update for both devices.

**PLEASE NOTE:** Not all vehicle systems are covered. If a particular vehicle is not covered, after the snoop process the RW5 or SA+ will display 'MODEL NOT SUPPORTED'.

## Features

---

- Detects data directly from the car immobiliser unit
- Please Note: Not all vehicle systems are covered
- Reliable and familiar process
- Fast cloning
- For cloning ID49-1E Renault and Dacia
- Works with the RW5 and Smart Aerial+
