

Description

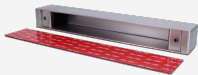

This glass door bracket kit resolves side load/pressure issues and offers a secure and reliable locking solution for glass doors, when used in conjunction with the ES8100 or ES8000 V-Lock. Suitable applications include frameless glass doors with a solid header frame and 90° or 180° single and double swing glass doors.

Please note that two brackets are required if there is a glass header, and that the bracket/s should always be installed at the secure side of the door.

Features

- Works in conjunction with ES8100 or ES8000 V-Lock (Not included)
- Self adhesive 3M tape holding force 900Kg
- Includes dress plate for opposite side of door
- Resolves problems with side load/pressure
