

PAC 511 DCi Single Door IP Controller C/W 3.6A PSU 30511

Description

The PAC 511 DCi is an intelligent IP access controller for securing and managing a single door. It can be deployed within a PAC access control system to support on-site access control, lift control and door functions either singularly or part of a larger PAC networked system. Additional features rely on management software, however it has in-built databases and processing ability to execute local access control and features associated with door management and lift control.

Features

- Supports ongoing access control and lift control functions if communication to the management platform is lost
- Boxed with pre-wired 3Amp PSU in a metal cabinet with lock and tamper switch
- Up to 20,000 keyholder records
- Controls door via fail safe or fail secure modes
- Use with maximum 2 readers
