

ADVANCED DIAGNOSTICS ADA2101 OBD Snoop D856911AD ID88 Volkswagen For RW5 & Smart Aerial+

Description

This Advanced Diagnostics OBD Snoop ID88 is a world-first cloning solution for popular Volkswagen, Audi, Seat and Skoda models. It is used together with an RW5 or Smart Aerial+ and the MyKeys Pro app to clone bladed keys. Connecting directly to the vehicles OBD socket this snoop is powered by the vehicle battery and the collected data is communicated to the MyKeys Pro app remotely via Bluetooth.

PLEASE NOTE: Not all vehicle systems are covered. If a particular vehicle is not covered, after the snoop process the RW5 or SA+ will display 'MODEL NOT SUPPORTED'.

Features

- Please Note: Not all vehicle systems are covered
- Reliable and familiar process
- Connects directly to the vehicles OBD port
- Data communicated to MyKeysPro app remotely via Bluetooth
- Works with the RW5 and Smart Aerial+
- For cloning ID88 Volkswagen Group vehicles
